

SPARTAN

PLUS-TWO

PLUS-TWO

Spartan cars are available factory-built, or as chassis and body for home completion, using mechanical parts from certain Ford or Triumph cars. Two basic models are offered:— 2 seater, which has a rear seat suitable for small children; and the Plus-Two on the long-wheelbase chassis, which will accommodate two children up to 11 years old, or give extra leg room for exceptionally tall drivers.

2-SEATER

Shown with hood and side screens stowed in rear.

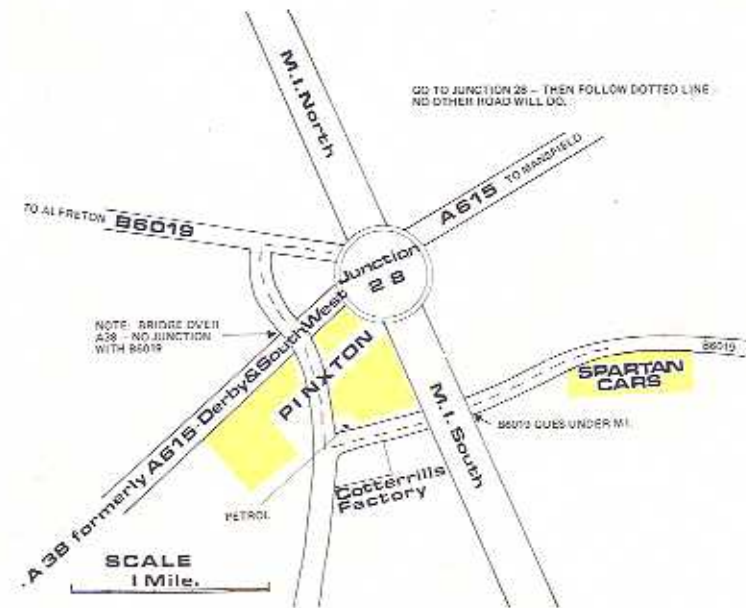

In a changing world, it's nice to know that some things are still made in the traditional way. The Spartan is one of only a tiny handful of cars made in the world using a true chassis. On to this, we mount an entirely aluminium body, using fibreglass solely for the four separate bolt-on wings.

PLUS-TWO

2 SEATER — Shown with side screens stowed in rear.
